

Jay Esquivel Savage

San Antonio, TX | 210-947-6588 | savagejay004@gmail.com | www.linkedin.com/in/connect-jay-esquivel-savage

EDUCATION

University of Texas at Dallas

Richardson, TX

Bachelor of Science in Computer Science

Aug 2024 – May 2028 (Expected)

- Completed coursework in Python, Java, and C++, focusing on data structures, OOP, and algorithmic design.
- Active ACM member, AIMD, ColorStack and FOCUS; participated in hackathons, workshops, and coding competitions.

PROFESSIONAL EXPERIENCE

CX Ventures

Remote

AI Development Intern

Jun 2026 – Present

- Contributed to AI product development initiatives through experimentation, feature prototyping, and iterative testing workflows.
- Collaborated across technical and business teams to support AI-driven solutions and improve development efficiency.

Texas Instruments — Engineer Your Own Future (EYF)

Dallas, TX

Engineering Leadership & Professional Development Participant

Jun 2026

- Selected to participate in a competitive engineering development experience focused on leadership, innovation, and career readiness.
- Engaged in technical workshops, engineering panels, networking sessions, and exposure to real-world semiconductor applications.

Gatora LLC

Virginia (Remote)

Software/AI Development Intern

May 2025 – Aug 2025

- Developed responsive React/Next.js components, improving UI load time by **30%** and enhancing user engagement in prototypes.
- Collaborated on image detection AI prototypes, assisting in dataset preparation and model testing with **85% preliminary accuracy**.

UT Dallas Computer Vision Research Lab

Dallas, TX

Research Assistant

Sep 2025 – Present

- Trained DeepLabCut pose estimation models, achieving **92% labeling precision** across behavioral datasets.
- Implemented SimBA behavioral classification workflows with **85% detection accuracy** for motion-based events.

Airtopia

San Antonio, TX

Flight Crew Member

Mar 2024 – Feb 2025

- Ensured safety compliance and provided instructions for trampoline and aerial activities.
- Supported team coordination for guest sessions and safety demonstrations.

PROJECTS

FlexForce | AI Sports Recovery App

Sep 2024 – Feb 2025

- Developed AI-driven recovery and injury-prevention plans, improving personalization accuracy by **35%** using adaptive profiling.
- Implemented frontend architecture in React/TypeScript, enhancing UI responsiveness by **40%**.
- Led 15+ user testing sessions and improved satisfaction score from **3.4** → **4.6/5** using feedback-driven iteration.

NetRealPulse — AWS Hackathon

- Built real-time network congestion prediction dashboard using AWS Amplify and Bedrock AI, achieving **92% simulation uptime visibility**.
- Integrated Claude Sonnet to automate issue alerts, reducing detection time by **45%**.
- Streamlined deployment using CI/CD pipelines, cutting deployment time from 3 hours to **25 minutes**.

Suverity — HackAI UTD Hackathon

- Developed an AI-powered resource matching platform for abuse documentation, achieving **78% predictive accuracy** for legal and support resource recommendations.
- Led full-stack team; improved user retention by **65%** through UI refinement and secure data handling.
- Recognized for **scalability, social impact, and AI-driven innovation** during final judging.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript, HTML/CSS

Frameworks/Tools: React, Next.js, PyTorch, AWS (Amplify, Bedrock), Git

Soft Skills: Leadership, Communication, Problem-Solving, Collaboration
